Claim Rejections - 35 USC § 112

Claim 26-29 , 31,33,34 and 46-49 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In said claims a “powder” is indefinite in scope.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 26-29 , 31,33,34 and 46-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Morrisette et al. US 20020150658.

The reference teaches a kit, along with the limitations of claims 31,33,34,46-49 comprising a dietary supplement product, wherein the dietary supplement product is a powder comprising one or more of a protein, peptide, amino acid, carbohydrate, electrolyte, herb, or combination thereof; and at least one additive, wherein the additive is packaged separately from the dietary supplement product. [Morrisette paragraph 0004, paragraph 0010 teaching a ready to eat cereal, which the examiner reads on a powder];

wherein the at least one additive when combined with the dietary supplement product, at a time after the manufacture of both the dietary supplement product and the additive, alters a characteristic of the dietary supplement product. [paragraph 10];

Art Unit: 3693

wherein the flavorant is selected from a group consisting of vanilla, chocolate, butterscotch, peanut butter, mocha, strawberry, banana, peach, orange, cherry, blueberry, raspberry, mango, apple, pineapple, grape, mint, caramel, cinnamon and combinations thereof. [paragraph 10, teaching a fruit];

The applicant argues that Morrisette et al fail to teach the dietary supplement product as a powder. A critical read of the prior art includes, for example, fluid batters which is a powder in combination with a liquid. Moreover, the Morrisette teaches that this fluid batter can be dry (col. 2., ll. 16-17). For at least this reason, this rejection is made final.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
